

— MARTA TEKNOLOJİ A.Ş.

Locally built solutions for enterprises.

We are a technology partner to organisations, with software products we build ourselves plus cybersecurity and infrastructure services.

Marta Teknoloji is a software and cybersecurity company based at Mersin University Technopark, Türkiye, since 2016. We develop, deploy and support our own products: from network security and Law 5651 compliance to corporate email, from data center monitoring to branch and production management. Most of our products run on the organisation's own servers, so your data stays with you.

Our Products

BUILT IN-HOUSE, RUNNING IN THE FIELD

01 • NETWORK SECURITY AND COMPLIANCE

LAW 5651 LOG RETENTION

LogHane

A notary for your FortiGate logs: sealed, timestamped, locked.

Seals FortiGate logs hourly into a SHA-256 chain, adds a daily RFC 3161 timestamp and keeps them in object-locked storage. When a prosecutor or court asks, an evidence package with its own verifier is one click away.

Cloud

On-premises

BROCHURE PDF ➤

GUEST WIFI AND CAPTIVE PORTAL

Hotspot Appliance

Authenticated guest WiFi with signed Law 5651 logs.

Authenticates guests via SMS/email OTP, the hotel PMS or Active Directory and ties every session to an identity. Deploys as an appliance, an OPNsense plugin or a FortiGate connector; every site is managed from one cloud panel.

Appliance

Cloud panel

BROCHURE PDF ➤

FORTIGATE INTERNET ACCESS PORTAL

Rosa FPortal

Internet access gated by registration, verification and approval.

Ties internet access on the corporate network to registration, SMS/email verification and IT approval. Approved devices join the allow group instantly via the FortiGate REST API; timed permissions close on their own and every action is audit-chained.

On-premises

BROCHURE PDF ➤

TWO-FACTOR AUTHENTICATION

FortiGate SSL VPN SMS Authentication

Two-factor VPN logins for FortiGate via local SMS providers.

Connects FortiGate's built-in SMS authentication to 5 local SMS providers; the customer only sets the SMS server on FortiGate. Firewalls, users and licences are managed from one portal.

Cloud service

BROCHURE PDF ➤

VOIP AND SIP FIREWALL

Rosa SIP Firewall

Stops SIP attacks in front of your PBX.

Detects SIP scanning, password guessing, floods and malformed messages, and bans attackers progressively by threat score. Includes toll-fraud thresholds, country restriction, threat intelligence and optional Suricata IDS.

Appliance

On-premises

ENDPOINT SECURITY AND THREAT NOTIFICATION

MartaSecurity

See suspicious activity on your servers and respond from one console.

An agent for Windows and Linux endpoints that monitors Active Directory events and Sysmon and Sigma detections and sends email and SMS alerts. Inventory, hardening and remote access are managed from a multi-tenant console.

Cloud

Agent

02 • COMMUNICATIONS, EMAIL AND DATA CENTER

ENTERPRISE MAIL SERVER

Rosa Mail

Multi-domain, highly available email on your own servers.

Hosts multiple domains in isolation on one platform. Two-node high availability, S3-compatible storage, multi-layer spam and virus protection, modern webmail and a central admin panel in one package.

On-premises

Cloud

BULK EMAIL SENDING

RosaSender

Secure, measurable bulk email with clean lists.

Prepare campaigns in one panel and send them through a queue-based engine. Bounces and complaints are handled automatically; delivery, opens and clicks are reported. A REST API lets your own systems send too.

SaaS

BROCHURE PDF ↗

DATA CENTER MONITORING (DCIM)

DCMon

From rack to virtual machine, your data center on one screen.

Brings rack, server, network device, storage and VM inventory into one platform, with vCenter sync, SNMP/LLDP discovery and topology, server room environment monitoring and threshold alarms.

On-premises

BROCHURE PDF ↗

NETWORK MONITORING (NMS) AND DESKTOP CLIENT

Lucia Network Analyzer

Monitor network devices over SNMP, manage them from the Windows desktop.

Discovers switches, routers, firewalls and servers over SNMP, tracks status, port traffic and hardware health, and raises rule-based alerts. Built on open-source LibreNMS with Marta's Turkish Windows desktop client and SMS alerts.

On-premises

BROCHURE PDF ↗

CLOUD PBX AND CONTACT CENTER

Santa Cloud PBX

PBX, contact center and browser phone on one platform.

A multi-tenant IP PBX managing extensions, IVR, queues, voicemail and conferencing from one web interface, with a contact center app offering a browser phone, live monitoring and campaigns. Built on FusionPBX and FreeSWITCH.

Cloud

On-premises

BROCHURE PDF ↗

WAF-PROTECTED HOSTING PANEL

DocMon

Every site in one panel, behind one WAF shield.

Protects multi-site hosting with ModSecurity v3 + OWASP CRS 4. Sites, SSL, backups, IP access rules, automatic IP banning and human verification are all managed from one web panel.

On-premises

BROCHURE PDF ↗

DEPLOYMENT OPTIONS

The tag on each product card shows how that product is delivered.

On-premises

Installed on the organisation's own server; data stays in-house.

Cloud

Operated by Marta Teknoloji; we handle setup and upkeep.

Appliance

A device for the site, shipped with a ready installation image.

SaaS

Over the web, with an isolated workspace per organisation.

03 • ENTERPRISE SOFTWARE

IDENTITY DEDUPLICATION AND SINGLE SIGN-ON

Kimlock

One identity, one username and one sign-on per person.

Consolidates records from student information and HR systems into one identity per person by national ID. Provisions accounts in Active Directory, Entra ID, OpenLDAP, Google Workspace and Zimbra; one identity for Microsoft 365, Google and eduGAIN over SAML 2.0 and for Wi-Fi and VPN over RADIUS, with MFA by SMS, email or authenticator app.

On-premises

BROCHURE PDF ↗

ASSETS, ASSIGNMENTS AND STOCK

Inventory Management System

Your assets, assignments and stock on one screen.

Manages hardware and fixed assets with serial number, warranty, warehouse and assignment details. Active Directory integration brings in users and org structure; warranty and stock alerts are built in.

On-premises

BROCHURE PDF ↗

OPERATIONS AND WORKFORCE

Branch Management Software

Tasks, shifts and staff for every branch on one screen.

Daily tasks, shift plans, QR and location-verified attendance, audits, training, faults, leave, overtime and expenses are managed in one place with role-based permissions.

On-premises

Cloud

BROCHURE PDF ↗

PRINT PRODUCTION MANAGEMENT

Label Process Management

Label production from order to winding, on one screen.

For label printers: meterage and time calculation, per-machine scheduling, and tracking of printing, slitting and winding. Paper stock is deducted at print; waste is recorded and reported.

On-premises

BROCHURE PDF ↗

IMPORT / EXPORT AND ACCOUNTS

Foreign Trade Management

Purchasing, sales, cash and profit for foreign trade in one place.

Purchases, sales, stock, customer and supplier accounts, and bank and exchange office balances in USD, EUR and TRY in one system. Profit is shown by file, product and brand.

On-premises

BROCHURE PDF ↗

CLOUD ERP FOR DISTRIBUTORS

Finsman

Accounts, cash, bank and field collection on one platform.

Customer accounts, cash and bank, cheques and promissory notes and invoices in one place. Reps collect the invoices on their daily sheets with the Android and iOS app; collections post automatically to cash, bank and accounts.

Cloud

Mobile

BROCHURE PDF ↗

IT SUPPORT TICKET MANAGEMENT

Support Flow

Turns WhatsApp support messages into tickets automatically.

Classifies messages arriving at connected WhatsApp accounts with local AI and opens tickets. Technician assignment, internal notes, a knowledge base, tasks, a customer portal and per-company reporting in one panel.

BEYOND OUR PRODUCTS, FOR EVERY IT NEED OF THE ORGANISATION

Cybersecurity

- Firewall deployment and management
- Penetration testing and vulnerability scanning
- SOC and managed security (MSS)
- KVKK (Turkish data protection) compliance consulting

Infrastructure and Cloud

- Network design and installation
- Servers, virtualisation and cloud
- IP PBX and VoIP
- Security camera systems

Software Development

- Enterprise application development
- Mobile application development
- Software team augmentation
- DevSecOps

Consulting and Support

- IT and cybersecurity consulting
- Security product supply and installation
- Maintenance and technical support
- 24/7 support line

Why Marta

Built in-house

Code, development and support sit with the same team, so we can adapt the product to your needs.

Your data stays with you

Most products install on your own servers; cloud options are operated by Marta.

Compliance by design

Law 5651 log retention, identity-linked access records and tamper-evident audit trails are built in.

One partner

A single partner for product, deployment, infrastructure and 24/7 support.
